Indriya Platform

Praveenkumar VASUDEVAN

What is Indriya?

- A software to design human robot interaction scenario based on human behaviors

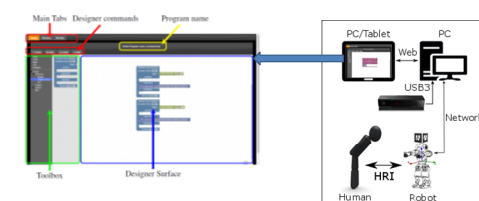

Why do we need Indriya?

- Robots will be everywhere in the future closely interacting with human!

- But it is not easy to program a robot without skills

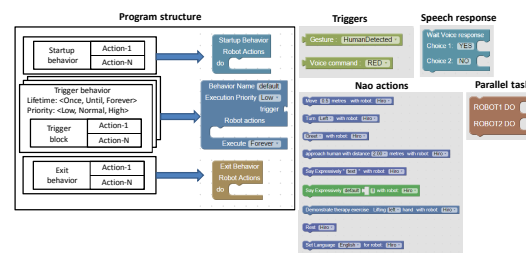

How does Indriya work?

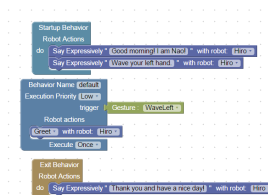

Steps:

- Choose the blocks from "Toolbox" and drop into "Designer Surface"
- Save with a name
- Press "RUN" button when you are done!
- Check the execution of the scenario

What are the blocks available?

A simple program.

- Can you guess what this program is doing?
